yara-debian

Backend engineer with 4+ years of experience building reliable, scalable systems for financial and enterprise products. I enjoy turning complex business logic into clean, maintainable solutions that make life easier for millions of users. I care about creating systems that are not just functional, but intuitive and impactful.

RELEVANT EXPERIENCE

Senior software engineer II, Factorial HR, Barcelona, Spain

Dec 2021-Present

- **Engineered and scaled backend systems supporting millions of users** across Europe, focusing on secure authentication, permissions, and financial-compliance flows.
- **Designed and delivered end-to-end backend features** in close collaboration with product, design, and business teams, translating complex requirements into stable, high-impact solutions.
- **Built a government-subsidy integration (FUNDAE)** critical to the Spanish market, automating financial validation and reporting processes that drove €44.6K in monthly recurring revenue.
- **Developed a reusable form-processing framework** powering workflows such as certifications, quizzes, and procurement approvals, collectively enabling over €234K in MRR.
- **Contributed to the refactor of the authentication platform for 3M+ users**, introducing improved confirmation flows and supporting the migration to AWS Cognito to enhance reliability and scalability.
- **Implemented a robust role-based permissions system** ensuring secure access control across multiple product domains.
- **Mentored engineers and led technical sessions** on best practices for scalable and maintainable backend architecture.

☆ *Ruby on Rails, React, GraphQL, Cursor, Datadog, AWS Cognito*

Software Developer, HedgeGuard Financial Software, Lebanon

Jul 2020-Dec 2021

- **Developed backend services for crypto portfolio and risk-management systems**, supporting institutional clients across multiple regions.
- **Integrated third-party providers via REST APIs** to synchronize trading, pricing, and portfolio data in real time.
- **Delivered analytics and reporting modules** used for investment performance and compliance monitoring.
- Ensured **code reliability and data integrity** across financial workflows handling large transaction datasets.

☆ *REST API, Angular, .NET*

SKILLS

- Ruby on Rails
- React
- GraphQL
- Git
- Datadog
- AWS Cognito
- Cursor
- System design and architecture
- Feature planning and prioritization
- Mentorship

EDUCATION

Bachelor of Engineering in Computer and Communications Engineering
University of Notre Dame, Lebanon
2015-2020

TECH CONFERENCE TALKS

- The Art of Code- Helvetic Ruby, 2025- Geneva, Switzerland
- The power of GraphQL - DevConf.cz, 2023- Brno, Czechia
